SUMMARY

I am a MERN Stack Developer with more than three years of experience. I am capable of building scalable and productive next-generation solutions. I have the best experience in developing and scaling web-based applications and products in both the development and production phases.

EXPERIENCE

FULL-STACK DEVELOPER
E-Shepherds Technologies   **May 2023 - Present, Hunza**

· Led the creation of more than 10 websites, ensuring their functionality, design, and user experience met high standards.
· Developed backend systems for various projects, totalling over 10, to support seamless data management and processing.
· Designed and implemented 3 web extensions, enhancing website capabilities and user interaction.
· Proficiently handled WordPress development tasks, delivering customized solutions for diverse client needs.

FULL-STACK DEVELOPER
Webloop   **February 2021 - May 2023, Rawalpindi Pakistan**

· Managed databases and contributed to the development of over 30 websites, maintaining 99.9% uptime and optimizing load times by an average of 30%.
· Spearheaded the creation and launch of more than 8 NFT Marketplaces, resulting in a significant increase in user engagement.
· Developed APIs for a diverse range of projects, totalling more than 20 backends, resulting in improved data exchange efficiency and reduced integration time.
· Seamlessly integrated and optimized over 100+ APIs across different systems, resulting in smoother processes and time savings.
· Designed attractive frontends for 10 projects, consistently achieving high user satisfaction scores.

PROJECTS

Meal Plan Coach
Meal Plan Creators · January 2023 - Present

· Developed an all-in-one Meal Plan Coach Platform that empowers users to create, personalize, and download meal plans, recipes, and grocery lists. Admin capabilities include recipe and meal management, while users can access tailored plans, track progress, and explore a range of nutritious recipes. The platform streamlines meal planning, promoting healthier lifestyles through convenient, user-friendly features.

Playasa
January 2023 -August 2023

· Developed Playasa, a dynamic beach property selling website featuring advanced filters, lead generation, broker collaboration, and enterprise functionality. Enabled seamless property searches for users while facilitating efficient lead management and business interactions. Streamlined the process of buying and selling beach properties through innovative online tools and interfaces.
